

[you know better than anyone]

It's not just a wound, it's a patient.

NEW MEDIHONEY™ dressings make it easier to take care of both.

Unique MEDIHONEY dressings can be used for wound bed preparation and through all phases of wound healing.

- Contain medical-grade Active *Leptospermum* Honey
- Novel properties help manage acute wounds, burns, and tough, chronic wounds of various etiologies¹
- Demonstrated efficacy from onset of a wound through to closure²
- Patented composition has everything a healing wound needs, when it needs it
- A safer, easier way to provide exceptional patient care

WOUND & BURN DRESSING

MEDIHONEY™

with Active *Leptospermum* Honey

[it has honey?]

It's not just any honey. It's **MEDIHONEY™**.

A unique new line of dressings with Active *Leptospermum* Honey—
for dynamic moisture balance.

- Promotes a moist environment conducive to healing
- Highly absorbent, for excellent exudate management
- Cleanses and debrides due to its high osmolarity
- Helps to lower the wound pH, for an optimal wound healing environment
- Non-toxic, natural, and safe
- Easy to use, easy to apply
- Makes wound and burn protocols easier to learn and follow

Join the many caregivers whose patients have benefited from the use of **MEDIHONEY** dressings in Europe and other countries for years. Contact your Derma Sciences representative today, call 800 445 7627, or visit us on the web at www.dermasciences.com.
